Letter of Support: Kids and Technology

Eumecca Long
8505 Trinity Rd.
Cordova, TN 38018

November 19, 2010

Dear City of Memphis Funding Committee,

As the Director of Bert Ferguson Community Center, I would like to express my support for the STEM Pods Project provided by Kids –N- Technology. This project is important to Bert Ferguson Community Center specifically because it provides after-school and summer programs that assist students ages 5 to 17 with hands-on and innovative instruction, competitive robotic events, and community outreach activities in a structures and family-friendly learning environment.

Kids-N-Technology is an important part of our program at Bert Ferguson because it provides Educational Support and Development to the participants at our center, which is one of the core values of our program. This program would be a collaborative effort of organizational resources to effectively and efficiently meet the mission of our service center.

I am truly grateful for the opportunity that the City of Memphis is providing with this grant, and I highly recommend awarding this grant to Kids-N-Technology. If any other information is needed, please feel free to contact me at: Eumecca.Long@memphistn.gov or (901) 309-1761.

Sincerely,

Ms. Eumecca Long

Director, Bert Ferguson Community Center
